## About me

As from the first day I saw a PC, my intense thirst for knowledge has never been satisfied when it comes to technology, which makes me love to learn new things each day.
I develop websites, REST API's, plugins for MT5 Platforms, I'm an administrator & manager of well-known platform and I teach programming online.
A fast learner and lover of new sciences, I can describe myself.
you can check my personal website (Online CV) to find my social networks and portfolio here

# Related Projects

- # Multigent

  MT5 Plugin

  A stand-alone, easy-to-connect server to manage agent commissions, connects to the MT5 Platform using Web API, checks for new agent commissions on the main commission account (which should be an agent for all accounts), when new commission comes the server will distribute the amount according to a preset setting the agents for each account and their percentages.

  A test environment could be provided on request.

# Related Projects

- ## MobManager

  MT5 Plugin, Flutter front-end provided by [Naem Al-Najjar](#)

  A simple cross-platforms application to perform some of operations on MetaTrader5 Accounts, such as checking money status, trades, margin level, deposit/withdraw balance, transferring balance to other accounts at instance and checking/changing master & investor Passwords.

  A backend server must be installed and connected to the platform using socket connection to get data to send to the app.
